

# Muhammad Abubakar

Full Stack Developer

+923269407599    abubakardev62@gmail.com    Gujranwala, Pakistan

## S U M M A R Y

A dedicated Full Stack Developer with 3 years of experience in building cross-platform mobile applications and full-stack web solutions using React Native, React.js, Next.js, Node.js, Express.js, and MongoDB. Experienced in delivering real-world products across diverse domains including social platforms, job management systems, trading applications, and construction management tools. My goal is to build clean, scalable, and high-performance software that provides seamless user experiences. Throughout my career, I have continuously sharpened my skills in both frontend and backend development while collaborating closely with teams and clients to deliver quality solutions.

## E X P E R I E N C E

### Full Stack Developer App Crates

Sep 2025 - Present

- Developing and integrating RESTful APIs using Node.js and Express.js.
- Designing and implementing data models and database schemas using MongoDB.
- Building and maintaining user-facing features and components using React.js and Next.js.
- Participating in code reviews, ensuring code quality and adherence to best practices.
- Communicating directly with clients to gather requirements and manage multiple projects simultaneously.
- Contributing to team growth by supporting onboarding of new members.

### React Native Developer Devsoul Technologies (Pvt.) Limited

Jul 2024 - Aug 2025

- Built cross-platform mobile applications with React Native and responsive web applications using React.js.
- Integrated REST APIs, Firebase Firestore, and Supabase with efficient state management through Redux Toolkit, RTK Query, and React Query.
- Worked closely with UI/UX teams to deliver pixel-perfect designs and published mobile apps on the Google Play Store.
- Leveraged tools like Git and Figma while following Agile/Scrum methodologies to ensure timely delivery of scalable, high-quality solutions.

### MERN Stack Developer IT Oasis

Jul 2023 - June 2024

- Designed and developed scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Built and maintained RESTful APIs and integrated third-party services to enhance application functionality.
- Implemented authentication, authorization, and secure data flows across various projects.
- Collaborated with cross-functional teams to deliver features on time and participated in regular code reviews.

## S K I L L S

|                   |              |
|-------------------|--------------|
| React Native      | CSS3         |
| React.JS          | Git & GitHub |
| Next JS           | Firebase     |
| JavaScript (ES6+) | Expo         |
| TypeScript        | VS Code      |
| Tailwind CSS      | Postman      |
| HTML5             | Redux        |
| Node.js           | Context API  |
| Express.js        | MongoDB      |
| MySQL             | REST APIs    |

PROJECTS

---

**Buycex Trading Web**

*Project Link: <https://www.buycex.com/>*

Worked on a cryptocurrency trading platform using ThinkPHP and React.js. Developed the P2P trading and Spot trading modules with real-time updates, escrow handling, order book integration, and trade execution. Focused on clean UI/UX, API integration, WebSocket communication, and overall performance optimization.

**Construction Management System**

A web-based construction management system designed to streamline project planning, resource allocation, document management, and team communication. The system enables administrators, managers, and clients to manage projects, assign resources, track progress, and securely store construction documents, improving operational efficiency, transparency, and collaboration across all stakeholders.

**ThisLinks**

*Project Link: <https://thislinks.online/>*

ThisLinks is a job management and task tracking system that enables organizations to assign, monitor, and complete work in real time. Employees receive job assignments through the platform and can log job start/completion with time tracking and status updates visible to supervisors. The system uses Firebase Realtime Database and Firebase Cloud Messaging for the mobile app, providing instant data sync and push notifications for new tasks, ensuring transparency and efficient progress tracking across teams.

**DiveIn – Social Conversation App**

DiveIn is a React Native (Expo)-based social app designed to help users stay connected through daily conversation prompts that encourage meaningful group interactions. The app uses Supabase for authentication, database management, and real-time features, ensuring smooth data flow and secure user management. Built with a clean UI, fast performance, and an engaging user experience on Android.

---

|                                           |                |
|-------------------------------------------|----------------|
| Bachelor's in Information Technology      | 2024 – Present |
| Virtual University of Pakistan            |                |
| Intermediate in ICS                       | 2022 – 2024    |
| Govt College Of Satellite Town Gujranwala |                |

ADDITIONAL INFORMATION

---

- Available for remote or on-site opportunities.
- Passionate about building modern, scalable applications.
- Strong collaboration, problem-solving, and communication skills.
- Actively learning and working on real-world projects to grow as a full-stack developer.
